

Compressed-air and compressed-gas technology

BEKO TECHNOLOGIES. Better through Responsibility.

Why is it good to be better?

Because that is the incentive that keeps us moving and striving – and repeatedly setting new standards.

For more than three decades now, our name has been synonymous with high-performance compressed-air and compressed-gas technology that has been tried and tested all over the world. It has been synonymous with products, systems, and solutions that safeguard the required quality in our customers' production processes and it makes those processes more energy-efficient. It is synonymous with quality made in Germany – and values made by **BEKO TECHNOLOGIES**.

The fact that we have been an independent family-run firm since our foundation characterizes and shapes the way we carry on our business. Hands-on responsibility is our mission – in the development and production areas, in dealings with our customers and partners, and toward society and the environment. We make all of our decisions with our hearts and our minds. This is the passion that makes us what we are:

BEKO TECHNOLOGIES. Better through Responsibility.

MAY WE INTRODUCE OURSELVES?

- › Founded in 1982 by Berthold Koch
- › Independent and family-owned then, now, and in the future
- › Headquartered in Neuss, Germany
- › With manufacturing plants in Germany, the USA, India, and China
- › With a global sales organization close to the customers
- › With high standards and values that are internalized
- › Certified in accordance with EN ISO 9001:2008

What would you do if you kept discovering new energy-saving potential?

You would never tire of searching for ways to exhaust that potential. Just like us. That is why we are systematically furthering the development of our components and systems in all areas of compressed-air conditioning and condensate and measurement technology. In the interests of optimized compressed-air and compressed-gas technology. In the interests of holistic solutions from a single source – and for the success of your business.

Condensate drainage

Electronically level-controlled condensate drainage in the compressed-air system with the BEKOMAT® – without any loss of compressed-air and with minimal energy expenditure.

Filtration

Low energy costs, long service lives, excellent process reliability, and safe filtration of aerosol, oil, and dust with CLEARPOINT® filter technology.

Process technology

New standards in compressed-air conditioning for highly sensitive applications with the pioneering BEKOKAT® catalysis technology for optimized production processes.

Service

Services ranging from the cleaning and maintenance of your compressed-air facility through volume-flow, pressure and leakage measurement, and all the way to online calculation tools for your plant planning.

Condensate processing

Efficient and environmentally friendly condensate management with the ÖWAMAT® oil-water separation systems and the BEKOSPLIT® demulsification plants.

Drying

Significantly reduced operating costs with the application-optimized DRYPOINT® refrigerant, adsorption, and membrane dryers and the EVERDRY® heat-regenerated adsorption dryers.

Measurement technology

High-precision quality-assurance management thanks to the permanent, application-specific monitoring of the compressed-air parameters with the measurement-technology program METPOINT®.

A NEW CHANNEL FOR COMPRESSED AIR

Compressed air gets things moving: us, our customers – and perhaps you too. Find out how by following the QR code to our YouTube channel.

How does it feel when it's a **perfect fit**?

Pretty good. At least that's what our international customer base says, and they include companies from every commercial sector. And how do you achieve this feeling? By always being ready to enter into dialogue, by having the necessary personal affinity, and by having a profound understanding of how the business partner ticks.

Always different, always right.

The right solution for your application is as individual as you are. Every industry, every company, and every segment has its very own requirements, market conditions, and statutory objectives.

We can fulfill them – as a reliable contact and dialog partner that understands international practice and knows what really matters. With an expert team of engineers who collaborate with you to plan your production facility and develop customized solutions. In this way, we help you to make the most of your own energy-saving potential.

We speak your language: Thanks to more than 400 employees in branch offices all over the world, we know the international markets and have everything it takes to meet your requirements optimally.

INDIVIDUAL SOLUTIONS

- › Automotive industry
- › Construction materials industry
- › Chemical industry
- › Electronics industry
- › Food industry
- › Metal industry
- › Petrochemistry
- › and more

Do you want to know what we think **of you?**

That we are on an equal footing. This is why we can always give you the right professional support – with our swift service, our global experience in maintenance and customer support, and our comprehensive advice and services in the pre- and after-sales areas – all coordinated for the specific requirements of international markets.

MAINTENANCE

- › Regular checking of your compressed-air/compressed-gas facility
- › Expert maintenance, repair, and calibration
- › Test runs before (re-)commissioning
- › Fast availability of service engineers in the event of breakdowns

TRAINING

- › Authorization scheme for service staff in three certification stages
- › Access to eLearning programs for basic technical training
- › Modular training programs for distribution and service in our own training academy
- › Conducted by the **BEKO** Education Center

PLANT OPTIMIZATION

- › Ascertaining the energy-saving potential
- › Data gathering and analysis using METPOINT® measurement technology
- › Optimum integration into your existing systems
- › Advice, installation, and expert disposal of old systems

SPARE PARTS SUPPLY

- › Original **BEKO** TECHNOLOGIES exchange and replacement parts
- › Simple ordering procedures and fast handling
- › Availability at short notice
- › Proven **BEKO** quality

Digital as well.

We always think one step ahead. That applies to service, too. You can convince yourself of that right now at www.beko-technologies.com. There you will find the latest generation of service, our online calculation tools for the efficient planning of your compressed-air system. Then there's our interactive eLearning program that covers the most important basics of compressed-air technology.

What happens when everyone gives something back?

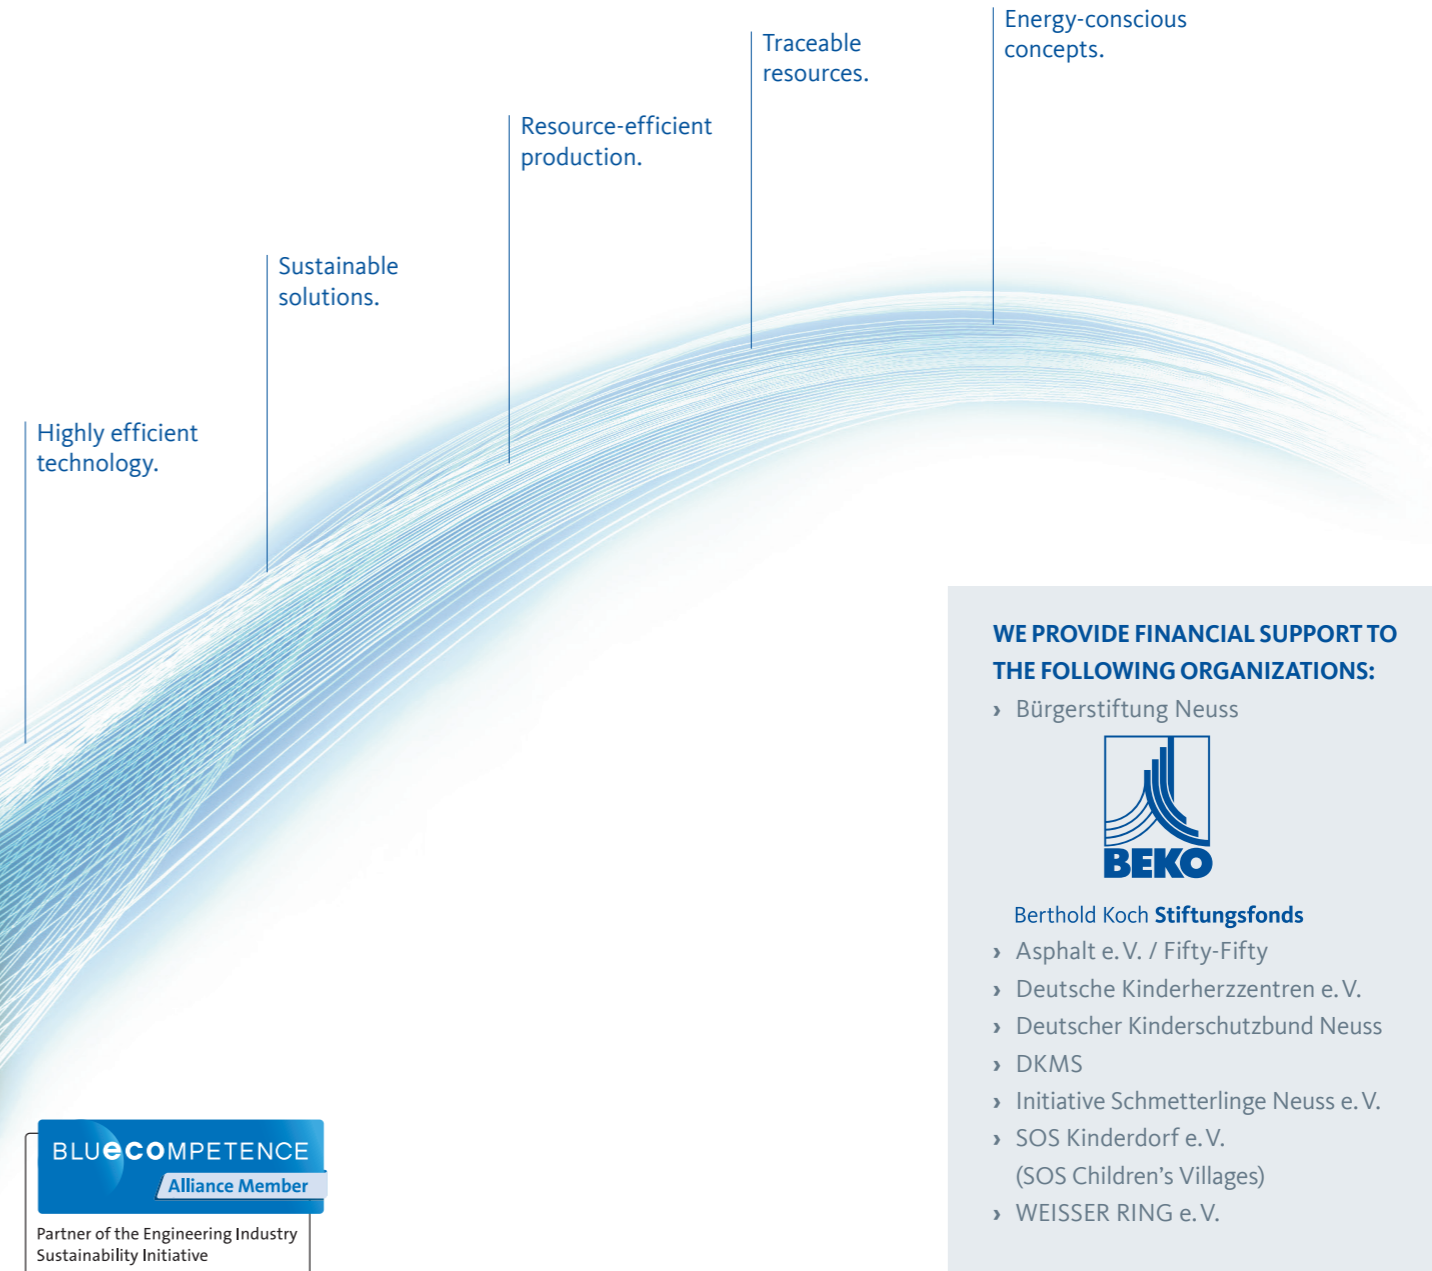

It helps every one of us! As a family-run company, we know how much can be achieved if we are there for each other. And we know that the upcoming generations have the chance of a decent future only if we do the groundwork today. Which is why we do our bit for society, the environment, and the ongoing education and training of our own rising stars. Because we believe that it is the right thing to do.

Sustainability is the sum total of good decisions.

We are future activists. That begins with our solutions – and goes much, much further. We care very much about where our raw materials come from. About the impact that certain manufacturing processes have on the environment. And about the packaging in which our products leave the factory.

We prefer to ask too many questions than too few. Even of ourselves. For example, when it comes to heating our offices. Or simply about how each of us can produce less waste in the workplace.

What can we do for you?

Only you can answer this question.

We look forward to hearing from you!
